A Four Oaks Landmark

Built in 1923, Four Oaks United Methodist Church has provided a stunning and historic setting for the worship of Jesus Christ for nearly 100 years.

The entire community is familiar with "the Methodist church" with the Italianate architectural design right in the center of town. Just one block over from our small town's main street, visitors to our community are able to enjoy the beauty of the church and are welcomed to be a part of worship and gatherings.

What do YOU see?

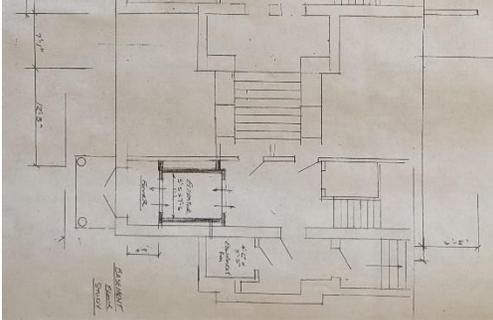

When you look at our church, do you see the glorious story of Jesus? Do you feel comforted as The Good Shepherd stands among his sheep? Is your heart softened as Jesus welcomes a child to his side?

The memories formed in our midst reflect generations of worshipers who have been enlightened by the church's symbolism and inspiration. The stories depicted here are timeless, and the craftsmanship is unmatched.

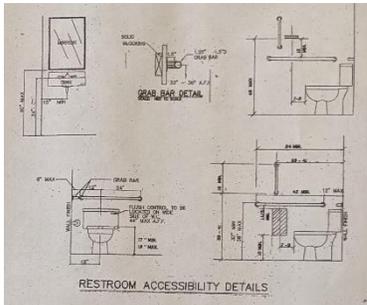

Now, you have the chance to be a part of preserving and renewing our beautiful church!

Over time, our precious building has begun to deteriorate at a rate that exceeds our budget funding. We are anticipating the need to fundraise \$250,000 to "Build Our Future". Costs for the needed construction are:

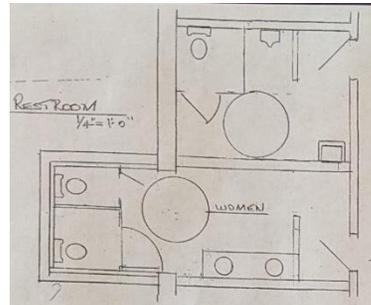

- Roof Replacement \$40,000
- Indoor Elevator \$185,000

- Bathrooms \$17,000

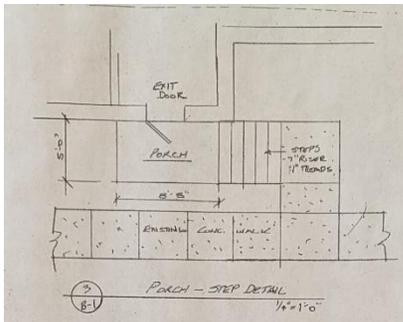

New and Accessible

Basement Renovation

- Landing for Side Steps \$2,000

Won't you help us be good stewards of this architectural wonder?

YES! I want to make a difference and support "Building Our Future!"

Please prayerfully consider your opportunity to make a difference. Your generosity will be the key as we work to **raise \$250,000 by 2023**. The sooner we reach our goal, the sooner the work can begin to protect the future of Four Oaks UMC.

*Thank for you your generous gift!
May God be glorified in our efforts to preserve and renew this place of worship.*

Please note your gift designation "Building our Future" in the memo section of your check or donate online at <https://nccumc.org/giving/church/>

Donations are tax deductible.

Long Range Planning Team
